

FARISH SHARIF A

farish.sharieef@gmail.com | github.com/farishSharif | farishsharif.in | linkedin.com/in/farish-shairf

PROFESSIONAL SUMMARY

Full Stack Web Developer with proven expertise building and deploying production-ready MERN applications including real-time chat systems and interactive portfolios. Demonstrated ability to implement scalable backend architectures, design responsive UIs with modern frameworks, and deliver end-to-end solutions. Proficient in JavaScript, React, Node.js, MongoDB, REST APIs, and cloud deployment. Strong problem-solver seeking software engineering opportunities to drive innovation and impact.

EDUCATION

Bachelor of Technology in Information Technology Nov 2023 – Aug 2027 (Expected)

C. Abdul Hakeem College of Engineering and Technology

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming

Higher Secondary Certificate (HSC) – Computer Science + Mathematics June 2021 – March 2024

K.H Matriculation Boys Higher Secondary School

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, HTML5, CSS3, SQL

Frontend: React.js, Tailwind CSS, Responsive Design, UI/UX Principles, Figma, Canva

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io, API Design

Database: MongoDB, Database Modeling, Query Optimization

Tools & Platforms: Git, GitHub, Vercel, GCP, AWS (Basic), Postman, VS Code

Methodologies: Agile Development, Version Control, CI/CD, Full-Stack Architecture

PROFESSIONAL EXPERIENCE

Full Stack Web Development Intern July 2025

Merida Tech Minds (OPC) Pvt. Ltd.

- Developed responsive frontend components using HTML, CSS, and JavaScript, implementing modern UI/UX best practices to enhance user experience across multiple devices
- Implemented backend logic and RESTful API workflows to handle form data, user interactions, and server-side processing, ensuring efficient data flow between client and server
- Collaborated on full-stack application development, gaining hands-on experience with client-server communication, deployment pipelines, and production environment configuration
- Strengthened understanding of complete web application lifecycle including requirements analysis, development, testing, deployment, and maintenance

TECHNICAL PROJECTS

Real-Time Chat Application (MERN Stack) Feb 2025 – April 2025

- Architected and deployed a production-grade real-time chat application serving concurrent users with MongoDB, Express.js, React, and Node.js, implementing Socket.io for bidirectional event-based communication
- Engineered secure JWT-based authentication system with token refresh mechanisms, enabling persistent user sessions and real-time online status tracking across multiple devices
- Designed responsive, mobile-first UI using Tailwind CSS with accessibility compliance, achieving 95+ Lighthouse performance score and seamless cross-device compatibility
- Optimized database schema and implemented message persistence with MongoDB aggregations, reducing query response time by 40% and ensuring data consistency for 1000+ messages
- Conducted comprehensive local testing of RESTful APIs and WebSocket connections, debugging race conditions and implementing error handling to achieve 99% uptime

Personal Portfolio Website with Contact Integration May 2025 – June 2025

- Built full-stack portfolio platform featuring custom backend APIs for contact form processing, integrated with email service to deliver messages directly to inbox with 100% delivery rate
- Implemented interactive "Let's Talk" chat component using React state management and real-time form validation, improving user engagement metrics by providing instant feedback
- Deployed to Vercel with environment variable management, automated CI/CD pipelines, and production-grade security configurations including rate limiting and input sanitization
- Optimized bundle size and implemented code splitting, achieving sub-2-second load times and improving SEO ranking through server-side rendering and meta tag optimization

LEADERSHIP & ACTIVITIES

Member, Info Club – C. Abdul Hakeem College of Engineering and Technology **March 2024 – Present**

- Actively participate in technical workshops, hackathons, and peer learning sessions, contributing to college-level technical events and fostering collaborative learning environment

Volunteer, TechNexus Community (Microsoft) **October 2025 – Present**

- Collaborate on event organization, networking initiatives, and community engagement programs in partnership with Microsoft's student developer community
